Introduction

Game design is an important trend of digital learning, and also an important part of multimedia digital content. This course is designed to help students understand the concept of digital game design, and guide students to design simple digital games. The specific course objectives are as follows:

1. Enable students to understand the characteristics and developing of digital games.
2. Cultivate the accomplishment of being possessed of digital game design.
3. Cultivate the capability of implementing basic digital game system.

Outline

- 1.Introduction to digital game design
- 2.Introduction to digital game developing flow and software
- 3.Introduction to digital game project planning
- 4.Implementation and design of basic digital game system

Prerequisite

none

The Relationship Between Courses and Departmental Core Competencies and Basic Skills

Acquire professional knowledge of multimedia digital content design

Acquire the technologies, skills and the capability of using modern tools for practicing multimedia digital content design

Acquire the capability of integrating multimedia digital content knowledge and technologies

Acquire the capability of finding out, analyzing and solving complex interdisciplinary multimedia design problems

Acquire the capability of managing project, communicating each other, respecting different viewpoints and cooperating within the team

-  Acquire the capability of lifetime learning.
 -  Acquire the capability of collecting, interpreting and analyzing global multimedia industry trends, and participating in multimedia practical design.
 - Acquire professional working ethics and society responsibility
 -  Acquire the humanities and arts accomplishment, and the capability of creative thinking and innovative design.
